DETAILED ACTION

Claims 1, 11 and 32 have been amended. Claims 3, 10, 13, 15-31, 34-40 have been canceled. Claims 1, 2, 4-9, 11, 12, 14, 32 and 33 are pending. The examiner agreed to rejoin claims 8 and 9 to the instant examined claims in order to advance prosecution.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The Sequence Listing provides SEQ ID NO:6 as 470 amino acids in length, versus instant claims 8 and 9 which require residues 479-1197 of SEQ ID NO:6.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8 recites residues 479-1197 of SEQ ID NO:6, but examination of both the CRF and the Sequence Listing indicates that SEQ ID NO:6 as originally disclosed consists of only 470 amino acid residues.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed

invention. The instant claims are drawn to an antibody directed against residues 479-1197 of SEQ ID NO:6. The specification describes only residues 1-470 of SEQ ID NO:6. The description of the first 470 amino acids of the SEQ ID NO:6 protein fails to adequately describe residues 479-1197 of said protein.

A telephone call to Charley F Brown on September 27, 2007 failed to result in the cancellation of claims 8 and 9.

All other rejections and objections as set forth or maintained in the previous Office action are withdrawn in light of applicant's amendments.

Claims 1, 2, 4-7, 11, 12, 14, 32 and 33 are allowed.
